

Electrical enclosures

ALES manufactures electrical enclosures with different dimensions according to customer's needs. The enclosures are intended for low voltage networks and they are made from steel sheets protected with electrostatic powder coating with colors according to customer's choice. They are intended as base mounted or on/in wall mounted. We manufacture two types of electrical enclosures:

1. Measuring cabinets
2. Industrial cabinets

Industrial cabinets

Technical specification

Installation type	Base mounted or on/in wall mounted
Locking type	Lock & key
Material	Electrostatic powder coated steel sheet
IP protection	IP 43
Intended for indoor use	
Manufacturing with dimensions according to customer's order	
<p>The cabinet can be separated in several sections according to its application:</p> <ol style="list-style-type: none">1. Section for circuit breakers, contactors, motor protection circuit breakers etc2. Section for variable frequency drives with cooling outlet and fan3. Section for programmable logic controllers with cooling outlet and fan
